Quantum biology refers to  
applications of quantum  
mechanics and theoretical  
chemistry to biological objects  
and problems. Many biological  
processes involve the conversion  
of energy into forms that are  
usable for chemical  
transformations and are quantum  
mechanical in nature. Mon, 14

walks us through the evidence  
that the different shades of skin  
color among human populations  
arose as adaptations to the

intensity of ultraviolet radiation  
in different parts of the world.
